

VETERINARIAN QUICK ADJUST TRANSPORT

Model VT200

Our Veterinarian Transport combined with our Stretcher creates the ultimate modular gurney system. This provides an easy way to transport injured pets from the family vehicle into the clinic. The Gurney top is a Stretcher that can be used independently from the Gurney. This Transport can be quickly adjusted from car seat or tailgate height to working height with the animal on it. The pet can be moved easily throughout the facility and paved parking lot due to the large 5" hospital grade total lock casters. The system is constructed of medical grade polyvinyl chloride resin structural tubing which will not chip, dent, rust, crack, peel, fade, stain or sustain bacterial growth. These materials allow the unit to weight only 38 lbs. but handle a 250 lbs. capacity!

Gurney Height: With Stretcher, from 29.5" to 39.25" with 5 height positions
Transport Width: 26"
Transport Length: 46"
Transport Weight: 38 lbs.
Weight Capacity: 250 lbs.
