

## Decision Matrix

### MINI TILT-IN-SPACE SLIDE TRANSFER BATHER

#### General:

- Weight of client? The standard weight capacity is 150 lbs., optional up to 250 lbs.
- Seat width of client? Standard seat and back width is 15.5". Optional up to 22".

#### Backrest: Standard backrest height is 21"

- Do you want the backrest to stop above the clients head for full support?
- Do you want the backrest to stop at the clients lower head for support and ease of hair washing?
- Does the client require a Torso Belt?
- Are optional Swing-Away armrests necessary for the client?
- Are Lateral Supports necessary for upper trunk support?
- Is a Head Bolster necessary for head placement?
- Does the client need an "H" or "X" Harness?
- Does the open degree of angle need to be different than standard for the client?
- Would a padded panel seat or back in place of the tension adjustable mesh benefit the client?
- Would the client benefit from an adjustable padded headrest?

#### Seating: Standard seat depth is 14"

- Is the standard seat depth adequate for the client's leg length?
- Does the client need support for their lower legs other than the pull-out bar? (Calf Extension)
- Are Ankle Straps necessary?

#### Rolling Chassis: Standard Seat to Floor height – Customer Specifies 25" to 33"

- What is the best working height for the care giver?

#### Tub Frame:

- Has the manufacturer reviewed the completed bathroom diagram for necessary modifications?
- Does the client prefer lock out pins verses D Pins for leg adjustment (requires up-charge)
- 

#### Convenience:

- Would a Shower Wand Holder or Shower Caddie benefit the client?
