

# VETERINARIAN FOLDABLE HEIGHT ADJUSTABLE TRANSPORT

Model VT100

Our Veterinarian Transport combined with our Stretcher creates the ultimate modular gurney system. This provides an easy way to transport injured pets from the family vehicle into the clinic. The Gurney top is a Stretcher that can be used independently from the Gurney. This Transport can be adjusted from car seat or tailgate height to working height. The pet can be moved easily throughout the facility and paved parking lot due to the large 5" hospital grade total lock casters. Then the Transport can be quickly and easily be folded for storage when not in use! The System is constructed of medical grade polyvinyl chloride resin structural tubing which will not chip, dent, rust, crack, peel, fade, stain or sustain bacterial growth. These materials allow the unit to be light weight but handle a 250 lbs. capacity!

Folded Dimensions: 5.5"x 26.75"x 63.5"

Height: 28.75" to 38.75"

Width: 26"

Length: 39.5"

Weight Capacity: 250 lbs.

Weight: 29 lbs.

Height Positions: 6
