

# VETERINARIAN SMALL ANIMAL STRETCHER

Model VS100

Our Veterinarian Stretcher can be used by itself or can be combined with one of our Transports creating the ultimate modular gurney system. Our System will provide an easy way to transport injured pets from the family vehicle into the clinic. Openings in the Stretcher sling allow for easy line of sight attachment to our Transports. The lower structure of the stretcher ensures that the hand holds are always accessible, even when the Stretcher is on the ground. The Stretcher is constructed of medical grade polyvinyl chloride resin structural tubing which will not chip, dent, rust, crack, peel, fade, stain or sustain bacterial growth. These materials allow the unit to weigh only 16 lbs. but handle a 250 lbs. capacity! The tension adjustable sling is made from durable vinyl coated polyester mesh. The sling and belts can be cleaned with any disinfectant cleaners and can also be removed easily and laundered for deep cleaning. Buckle or hook and loop patient belts have multiple positions to accommodate different sized animals.

Height: 4.75"  
Width: 26.5"  
Length: 48.5"  
Weight: 16 lbs.  
Weight Capacity: 250 lbs.
